- Physical Impairments

Where To Start

- Exits
- Room Numbers
- Restrooms
- Room Designation
- Stairwells

Recent Projects

- Fanshawe College
- Lambton College
- East Lions Community Centre
- College Boreal

Installation Services Available

**INPS is the Leader in
3D Braille Printing**

Accessibility Standards

- Accessibility standards mandate how businesses and organizations provide accessible services to students, employees, visitors and community members.
- Organizations will be required to meet accessibility standards as outlined in the legislation.

Regulatory Rights

- The rights of persons with disabilities are protected under both the Canadian Charter of Rights and Freedoms and Ontario's Human Rights Code.
- The goal behind Accessibility is to create an inclusive society where everyone can participate to their full potential.

An Accessible World
Is An Inclusive World

Inclusion

- People with disabilities should have the same kind of opportunities as everyone else.
- They should be able to do all things most others take for granted.

Going to:

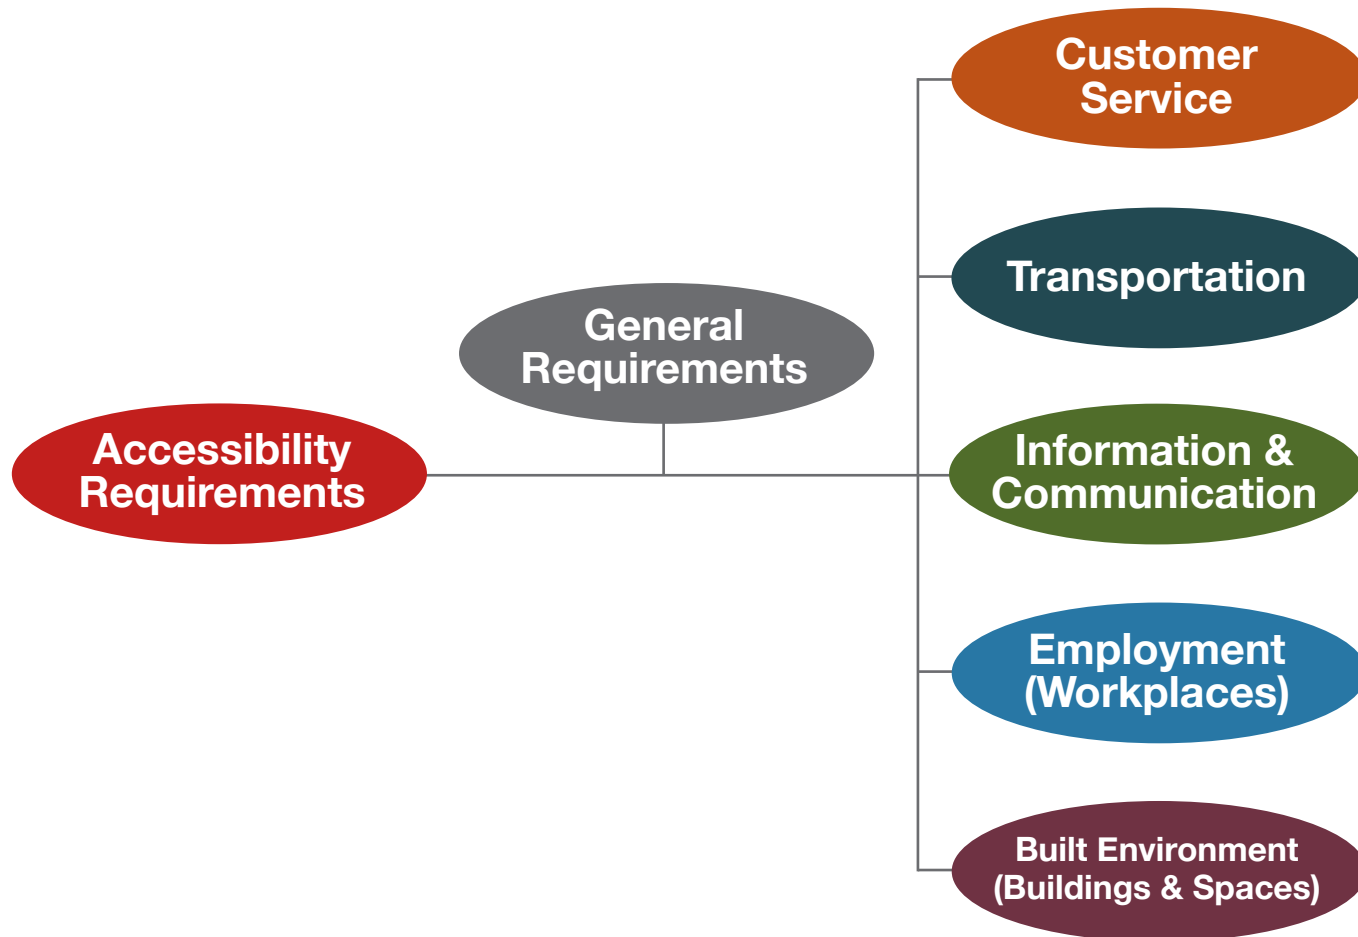

- Work
- School
- Appointments
- Shopping
- Theatre
- Office Buildings
- Restaurant
- Museums
- Retail Stores
- Social Service Establishments

Benefits

As Accessibility Increases:

1. People with disabilities will bring their talents to the workplace.
2. Youth with disabilities will have more opportunity for educational achievement.
3. Seniors will live more fulfilling lives.
4. Consumer spending by person with disabilities will rise.

Accessibility Standards

- Businesses and organizations that provide goods and services to people will need to meet certain standards in 5 major areas.
- All 5 standards are linked to the common goal of full accessibility by 2025 and should be treated collectively.

Customer Service

All businesses and organizations that provide services to people will be required to make their customer service operations accessible to people with disabilities.

It's about understanding that people with disabilities may have different needs.

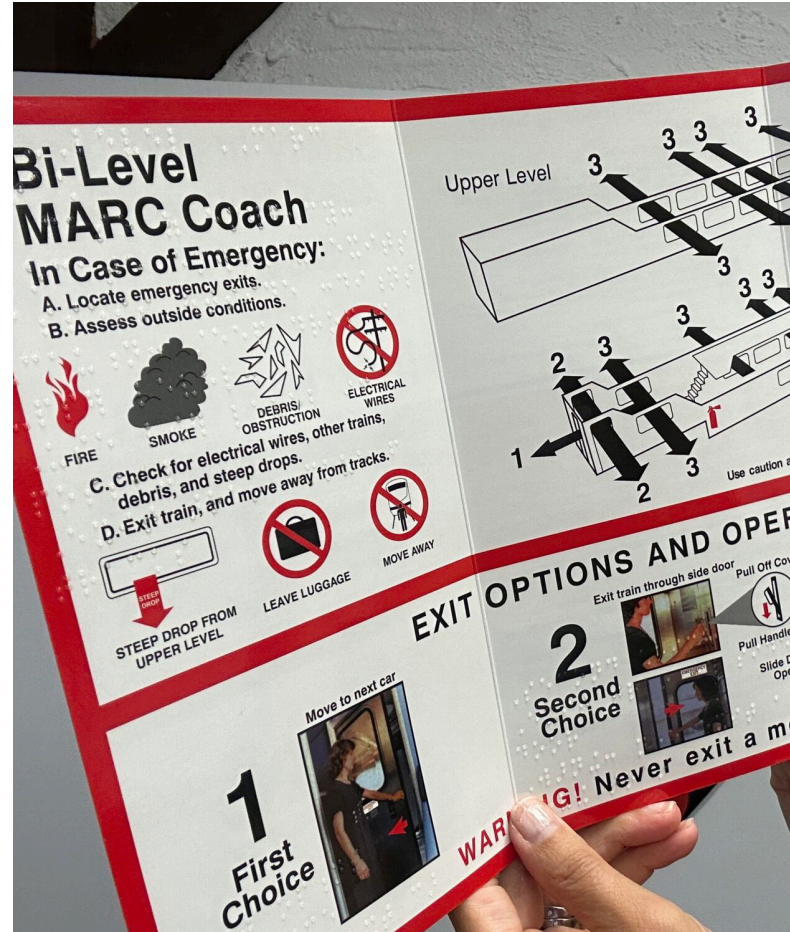

- Allow assistive devices in your workplace. (wheelchair, walker, oxygen)
- Allow service animals.
- Welcome support persons.
- Openly share when accessible services are not available.
- Invite customers to provide feedback.
- Put plan in writing and let customers know how to find it.
- Offer plan in accessible format (large print/braille).

Transportation

Standards Include:

- Verbal announcements to notify route, direction, destination and major stops.
- Not charging people with disabilities a higher fare or a fee to store their wheelchairs, canes and walkers etc.

Information & Communication

Will help people with disabilities access sources of information.

Examples:

- Screen readers help people with vision loss access more websites.
- Expand large print and digital collections in public libraries.
- Provide students with course information and learning materials in accessible formats.
- If your organization prepares emergency procedures, plan or public safety information, you will need to provide information in accessible formats, such as large print.

Employment (Workplaces)

- The accessibility standard for employment will help remove barriers and enhance support.
- In the workplace, it will allow for continuity between all employees. It will make accessibility a normal part of finding, hiring and communicating with employees with disabilities.
- Organizations need to provide their employees with emergency response information that is tailored to the employee's need, if the disability requires it.

Building Environment (Building & Spaces)

- Goal is help remove barriers in buildings and outdoor spaces for people with disabilities.

Public Buildings

Consider the following:

Cognitive

- Color coded signs
- Less information on signs
- Clearer legibility

Vision

- Braille signage
- Color contrast signage
- Sign placements

Hearing

- Audible wayfinding
- Text Telephones
- Volume control phones
- Less background noise

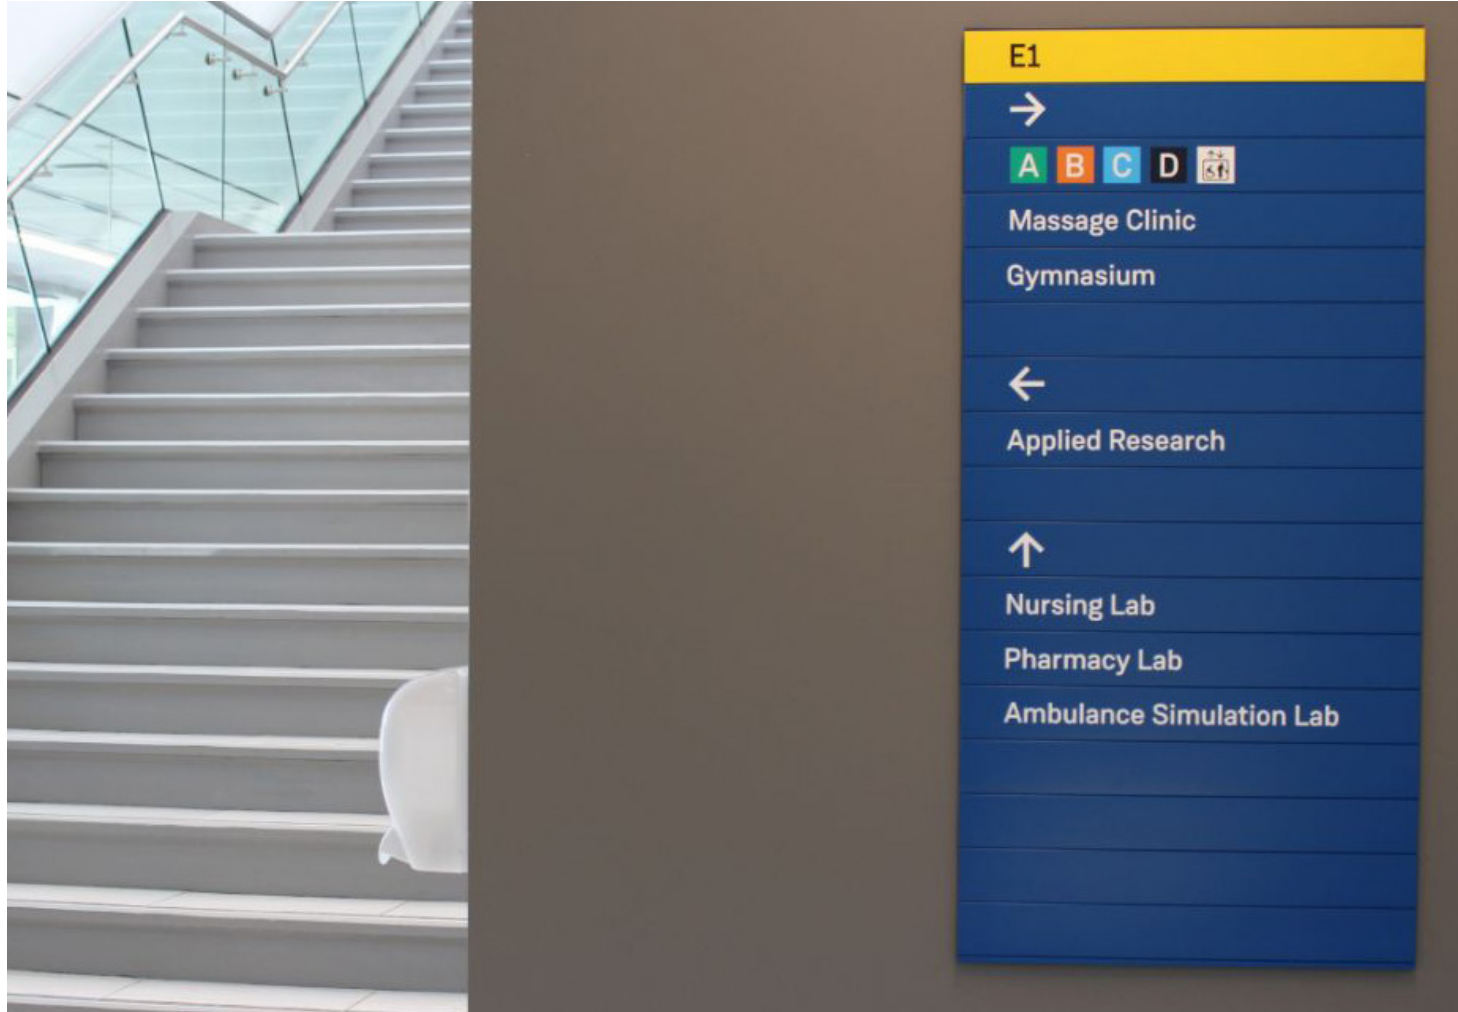

Physical

- Wheelchair accessible
- Sign placements

Regulatory Laws

“Have someone with a disability come to your establishment and evaluate their needs...”

**How can we help
your established
environment
become compliant?**

Helping People with **Cognitive** Impairments

We manufacture various signage to comply:

- Color coded signs
- Large print
- Proper fonts

Helping People with **Hearing** Impairments

- Subtitles and Sign language interpreters
- Vibrate on ring, LED flash for alerts, personalized messaging, closed captioning

Helping People with **Vision** Impairments

We manufacture various signage:

- Braille signage
- Color contrast signs
- Installation services to ensure proper sign placement

Helping People with **Physical** Impairments

We manufacture parking lot signs:

- Signage and decals
- International symbol of access
- Installation services to ensure proper sign placement.

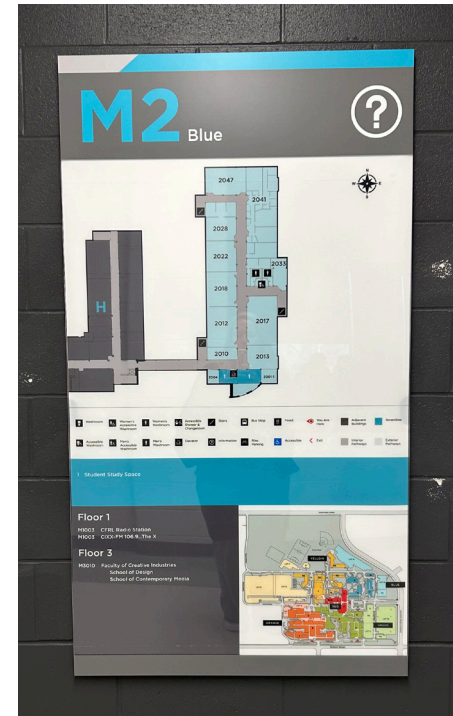

Where to **Start:**

- Exits
- Room Numbers
- Restrooms
- Room Designation
- Stairwells

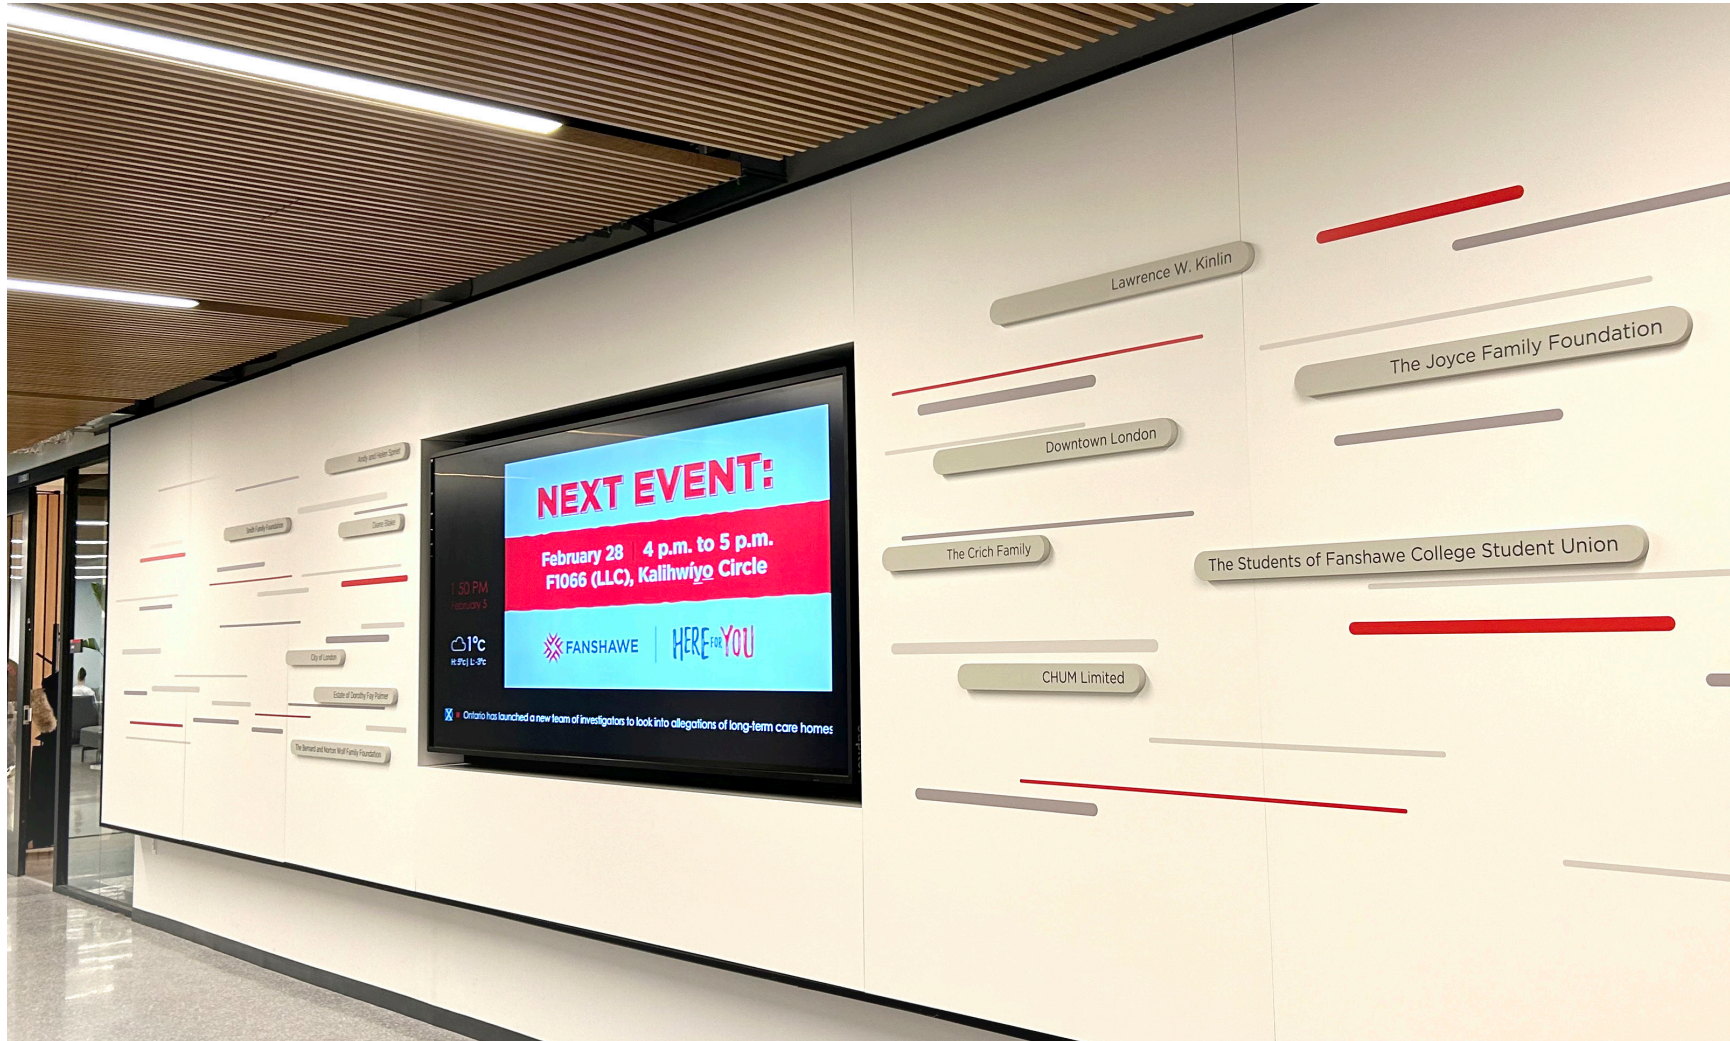

Consider the following:

- Fire Code Requirements
- Building Codes
- Municipal Legislation

INTERNATIONAL
NAME PLATE SUPPLIES LTD.

International Name Plate Supplies
works to service the **Graphic**
Market by providing **Branding**
and **Design Solutions**.

INPS has been involved in various projects where clients are dedicated to ensuring access within buildings and outdoor spaces as directed by established Building Codes.

INPS provides training on accessibility requirements for their staff at time of hire and when relevant changes occur.

Our installation team is trained on tactile/braille sign location requirements.

Inspiring Inclusion

Accessibility standards are laws that government, businesses, non-profits and public sector organizations must follow to become more accessible.

We can help.
