Protective and Graffiti Resistant Coatings and TSW Multi-Master Remover

QUICKLY REMOVES GRAFFITI FROM ALL SURFACES

INPS IS A PROUD AUTHORIZED TSW DEALER

Protective and Graffiti Resistant Coatings

Semi-Gloss Finish Graffiti Resistant Coating

TSW4 Acryli-Master

TSW4 dries to a clear semi-gloss finish. VOC Content: 9.78% (98 g/L)

Low Sheen Finish Graffiti Resistant Coating

TSW8 Acryli-Master

TSW8 dries to a clear matte finish. VOC Content: 9.28% (92.8 g/L)

TSW4 and TSW8 Acryli-Master are clear, water-based acrylic, non-sacrificial graffiti resistant coatings specifically formulated to provide repeated protection against graffiti vandalism by sealing the surface. For optimum results airless sprayer application is recommended. For small areas, touch up or when airless application is not practical, a roller and/or brush may be used.

Developed to: Provide repeated protection against graffiti attacks
May be applied on: Most surfaces both painted and unpainted

TSW4 and TSW8 Product Data Sheets available on request.

TSW9, TSW2 and TSW3G Product Data Sheets available on request.

How the TSW Coating works...

TSW Anti-Graffiti coating is designed to shield against UV damage and vandalism.

Application is effortless, with two simple methods available:

1. Roll-on application using a roller.
2. Spray-on application using a sprayer.

How the TSW Remover works...

Our Anti-Graffiti formula, developed over 25 years ago, effectively eliminates paint and marker stains from a wide range of surfaces.

For best results, it's recommended to act promptly. Compatible Surfaces Include: Plastic, Vinyl, Metal, Signs, Utility/Electrical Boxes

Spray our TSW2R solution, then use a clean rag to wipe the surface after a few seconds. In cases of thicker paint, a stiff nylon brush may be necessary for thorough cleaning.
